---

## About Me

I am Abdul Rahman, Motivated and detail-oriented junior developer with hands-on experience building web applications using **Laravel** and **React**. Eager to apply my knowledge to real-world projects and contribute to a dynamic development team.

---

## My Skills

HTML, CSS, JavaScript, React, PHP, Laravel, SQL, C++, JQuery, AJAX

---

## Latest Projects

School Management System:

GitHub: [The Code](#)

This School Management System is a comprehensive platform built using Laravel for the backend, React for the frontend, and MySQL as the database. It is designed to streamline various administrative, academic, and communication tasks in schools. The system facilitates role-based access for admins, teachers, students, and parents. Key features include:

- 1- **Admin Panel:** Admins can manage users (teachers, students, parents), assign roles, and perform CRUD operations on classes, subjects, timetables, and fees.
- 2- **Teacher Module:** Teachers can manage class attendance, assign homework, and register student marks. They can also send messages to students and parents.
- 3- **Student and Parent Module:** Students and parents can view assigned homework, check timetables, exam schedules, and fee statuses, and receive messages from teachers and admins.

Pharmacy Management System:

GitHub: [The Code](#)

This Pharmacy Management System is a web-based application built using Laravel (backend), React (frontend), and MySQL (database). It is designed to streamline pharmacy operations by managing inventory, processing sales, handling prescriptions, and maintaining supplier relationships. The system ensures efficient workflow automation while providing secure user access and role-based functionality, making it easier to manage day-to-day tasks. Key features include:

1- Inventory Management. 2- Suppliers Management. 3- Sales and Billing. 4- Prescription Management.
